OBJECTIVE

Product Manager at an AI influencer-marketing platform, where I took the product 0→1 and own AI features and integrations. CSE-AI graduate (2026) with prior GTM & product research at a FinOps SaaS startup.

EDUCATION

B.E. — CSE-AI	2022–2026
Chitkara University, Punjab	CGPA: 8.4
Class XII — CBSE	2021–2022
Guru Nanak English School	75%

TECH-STACK

Product: Figma, Notion, Google Analytics, Jira
Data: SQL, Python, Power BI, Excel, MS365
Technical: Zapier, Cursor, n8n, Prompt Engineering
Soft Skills: Stakeholder Management, Structured thinking, User Research

WORK EXPERIENCE

Product Manager Intern · [Discover AI](#) Apr 2026 – Present

- Took the platform from **0→1** to public launch (Brand App, Admin Panel, Creator App), onboarding **12 brands** including Kotak, Mudrex, Lemonn, and Sahi and processing **Rs. 50L+** in campaign spend in the first quarter.
- Led the AI product suite — Strategist AI, Brand Intelligence, Script Review, Video Review, and Brand Safety — with a **three-tier BFSI compliance layer** aligned to SEBI influencer regulations.
- Own the integrations roadmap: AppsFlyer attribution (postback-first ingestion, per-creator tracking), Shopify, WooCommerce, and GA4 — from API research to PRD to engineering handoff, enabling conversion attribution.
- Shipped the **campaign notifications system**: idle-based batching with three-channel routing (email, in-app inbox, web push) cutting noise while keeping campaign pipeline events real-time for brands and admins.
- Migrated creator analytics to a **zero-auth architecture** (InsightIQ + YouTube Data API v3), removing OAuth friction from onboarding and eliminating custom scraper dependencies.

Cloud Associate, GTM & Product Research · [ZopDev](#) Nov 2025 – Mar 2026

- Researched and qualified **70–80 B2B SaaS accounts/month**; synthesized weekly feedback from **5–10 clients** into product input docs reviewed by the engineering lead.
- Spotted a recurring pain point (non-production cloud cost waste) across **15+ accounts** and framed it as a product gap, adopted into ZopNight’s core GTM messaging.

Founder · [Food Holic](#) (Cloud Kitchen) Jan 2025 – Dec 2025

- Launched a bootstrapped cloud kitchen on Zomato and Swiggy; scaled to **Rs. 30K–45K/month** by iterating on menu, pricing, and portions based on weekly order data and client ratings.

PROJECTS

[Ad War Room](#) · Competitive Ad Intelligence Tool · *React, Node.js, Gemini 1.5 Flash, SQLite* 2026

- Identified a product gap: marketing teams at D2C brands had zero structured visibility into competitor ad strategy; built a tool that now tracks **500+ active ads** across **27 competitors** spanning **3 brand categories**.
- Designed a 3-page intelligence wizard solo covering brand profiling, AI-powered ad scoring with hook and CTA analysis, and a Gap Radar that surfaces unmet messaging angles by cross-referencing competitor ads against Reddit audience signals.
- Deployed end-to-end on Railway; output used as a weekly strategic brief, surfacing positioning shifts and creative gaps competitors aren’t capitalising on.
